SUMMARY

Highly analytical Software Engineer and Full Stack Developer with strong computer science fundamentals in Data Structures, Algorithms, and Object-Oriented Programming. Experienced in building scalable web applications, designing optimized REST APIs, and implementing machine learning and Generative AI pipelines. Proven track record in API development, database optimization (SQL, MongoDB), and version control (Git) within Agile environments.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, C, SQL

Frontend: HTML5, CSS3, JavaScript, React.js, Responsive Design

Backend & Frameworks: FastAPI, Node.js, Express.js, Flask, REST APIs, PyQt5

Databases: MySQL, MongoDB, Vector Databases (ChromaDB)

Cloud & Developer Tools: Git, GitHub, VS Code, Postman, Google Colab, Figma

AI/ML & Libraries: Scikit-learn, Pandas, NumPy, Matplotlib, Generative AI, LLMs (GPT-4, Claude), RAG Pipelines, Prompt Engineering

Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), Agile Methodologies, Problem Solving

EXPERIENCE

Freelance Full Stack Developer

Apr 2026 - Jun 2026

Roots of Araku (Organic Brand Platform)

Remote

- **Engineered** a responsive, high-traffic e-commerce and brand platform using the **MERN Stack** (MongoDB, Express, React, Node.js), improving page load speed by 28% and increasing site performance metrics.
- **Designed** and optimized custom **MongoDB database schemas** and REST API endpoints, streamlining checkout transaction flows and increasing checkout reliability.
- **Managed** the full **Software Development Life Cycle (SDLC)** from requirement gathering and UI wireframing in Figma to final production deployment and hosting.

Freelance Full Stack Developer

Jan 2026 - Mar 2026

Pickurstay Hotels (Hospitality Platform)

Remote

- **Built** an interactive stays discovery and booking platform using **React.js and REST APIs**, enabling users to filter, search, and select rooms in real-time.
- **Optimized** frontend interface responsiveness using **CSS Grid and media query animations**, boosting mobile conversion rates and user session duration.
- **Integrated** backend booking API endpoints, decreasing API query response latency by 32% while maintaining security protocols.

Data Science Intern

Aug 2025 - Nov 2025

Imaginnovate

Vizag, India

- **Developed** natural language processing (NLP) modules using **Python, Generative AI, and Prompt Engineering** techniques to automate data extraction.
- **Optimized** and validated **AI models** (LLM pipelines) for text classification, increasing validation accuracy by 15% and cutting text processing time.
- **Collaborated** in an **Agile development team** using Scrum methodologies, contributing to sprint planning and delivering production-grade AI code.

Data Analyst (Python Internship)

Apr 2025 - Jun 2025

Andhra Pradesh Skill Development Corporation (APSSDC)

Andhra Pradesh, India

- **Analyzed** complex, multi-variable structured datasets using **Python, Pandas, and NumPy**, identifying key statistical patterns and operational trends.
- **Created** interactive analytical dashboards using **Power BI, Tableau, and Excel**, translating data findings into visual charts to support business insights.

PROJECTS

AI Engineering OS

github.com/Saivivek-adigarla/AI-Engineering-OS

- **Designed** a developer framework utilizing **Python, LangChain, and CrewAI** to automate agentic workflows and prompt evaluation tracking.
- **Integrated** local **LLM inference configurations (Ollama)** and Retrieval-Augmented Generation (RAG) vector pipelines (ChromaDB) to query codebase knowledge.
- **Optimized** workspace configuration metrics, reducing local agent setup times and improving local vector database retrieval precision.

Grammar Assistance (Python | Backend & Frontend)

github.com/Saivivek-adigarla

- **Built** a desktop AI grammar assistant using **Python, PyQt5, and FastAPI** featuring system-wide keyboard hooks to capture and refine live user input.
- **Integrated** the **Gemini API** asynchronously for text correction, processing NLP requests with low latency.
- **Secured** API integrations by designing secure backend routes, improving reliability during concurrent server operations.

Smart Job Search Project

github.com/Saivivek-adigarla

- **Analyzed** hiring trends across 5+ developer roles using a custom **Python scraper**, cleaning and extracting in-demand skills from raw datasets.

- **Built** structured data pipelines using **Pandas and Matplotlib**, processing thousands of records to extract high-growth technologies.
 - **Engineered** interactive visual reports in **Power BI**, providing actionable insights to guide target career search decisions.
- Intelligent Fraud Detection and Prevention** github.com/Saivivek-adigarla
- **Built** a real-time transaction fraud threat detection system using **Python and Scikit-learn**, predicting fraudulent actions.
 - **Engineered** ML models (Random Forest, Logistic Regression) integrated with rule-based heuristics, securing a high accuracy rating.
 - **Deployed** the machine learning model via a **Flask API**, enabling real-time risk scoring and alert generation.

EDUCATION

B.Tech in CSE (Data Science) <i>Nadimpalli Satyanarayana Raju Institute of Technology</i>	2022 - 2026 <i>CGPA: 7.59 / 10</i>
State Board of Intermediate Education <i>Narayana Junior College</i>	2020 - 2022 <i>Percentage: 70%</i>
State Board of Secondary Education <i>Sri Vignan Public School</i>	2020 <i>Percentage: 99.4%</i>

CERTIFICATIONS

- **Amazon:** Solutions Architecture Job Simulation
- **MongoDB:** MongoDB and the Document Model
- **IIT Bombay Spoken Tutorial Project:** Java Programming Certification
- **Coursera:** Introduction to Artificial Intelligence (AI)
- **Microsoft:** Introduction to Generative AI

ACHIEVEMENTS

- Participated in **24-hours Hackathon 2024** conducted at NSRIT.
- Participated in "**Hack2Impact**" hackathon organized by IIC.
- Attended professional training workshop on **Blockchain** at Kakinada hosted by GVPC.
